User story	As a regular user: I want to be able to add expenses with title, amount, date and category. They should show in a list, and I should be able to remove them. I want to be able to undo in case of accidental deletion. I want a chart to show which categories have the most expenses.
App requirements	User can add an expense. Expense should have a title, amount, date and category. User should be able to enter the title, amount, date and category themselves. The expenses should show in a list with all details. There should be a chart for each category, and it should show which category has most expenses. There needs to be a way to delete the expenses and needs to be an undo function for a short while after deletion.

The file and folder structure for the project is:

Lib
    Models
        Expenses.dart
    Widgets
        Chart
            Chart_bar.dart
            Chart.dart
        Expenses_list
            Expenses_item.dart
            Expenses_list.dart
        Expenses.dart
        New_expenses.dart
